Remote Eyes®
Video Management Solutions for Financial Services

Who's minding your business?
Can anybody do it better than you?

Industry experts estimate that employee theft accounts for over 50% of all financial services losses. Remote Eyes easily interfaces with your financial transaction system to minimize employee theft, protect against liability and fraudulent claims, improve your operations management capability, and reduce losses.

Want to add 5% or more
to your bottom line?

Reduce theft and fraud now! Leading financial services companies are integrating Remote Eyes with transaction software at their branches. Multi-site operators use broadband to connect to their branches from anywhere. See, hear, talk to, and receive data from your branches no matter where you are!

Want to be at all your locations
at the same time?

View multiple locations simultaneously with MultiView Client. Mix cameras from different branch locations, such as all clerks or tellers, on a single screen layout (up to 32 cameras).

Exceptional Support!

Remote Eyes leads the industry for support:
- Excellent repair or replace warranty coverage
- FCC, UL, CE certifications for most configurations
- ISO-9001 manufacturing process

Extended video archive: Store 30 to 120 days of continuous recording with standard models (extended models available). Use video evidence to make your business immune to fraudulent claims, liability risks, and operational inefficiencies.

Reduce employee theft: Financial transaction data embedded in your video archive provides irrefutable evidence to crack down on employee theft.

Manage your operations: Use broadband Internet to connect to your branch locations from anywhere. Use Remote Eyes Enterprise Dashboard™ to see data and video from all your branches from any web browser. Daily operating reports tell you how many customers you served during each hour of operation, how much revenue you generated, and how much profit you earned!

Invest in your business: Financial services leaders are saving enough money with their Remote Eyes system to more than cover their costs, usually within weeks.

Increase Your Profits: *Use Remote Eyes to satisfy your loss prevention, cash shrinkage, employee theft, and remote management needs.*
