Remote Eyes®
Video Management Solutions for Hospitality

Who's minding your business?
Can anybody do it better than you?

The National Restaurant Association estimates restaurant losses due to internal theft exceed $20 billion annually. Integrate Remote Eyes with your restaurant or bar point of sale system to minimize employee theft, protect against liability and fraudulent claims, improve your operations management capability, and reduce losses.

Want to add 5% or more
to your bottom line?

Reduce shrinkage now! Leading dining and entertainment establishments are integrating Remote Eyes with their point of sale (POS) equipment in their restaurants and bars. Hospitality leaders are saving enough money with their Remote Eyes system to more than cover their costs, usually within weeks.

Want to be at all your locations
at the same time?

View multiple locations simultaneously with MultiView Client. Mix cameras from different restaurant locations, such as all bartenders and cashiers, on a single screen layout (up to 32 cameras).

Exceptional Support!

**Remote Eyes leads the industry for support:**
- Excellent repair or replace warranty coverage
- FCC, UL, CE certifications for most configurations
- ISO-9001 manufacturing process

Extended video archive:
Store 30 to 120 days of continuous recording with standard models (extended models available). Use video evidence to make your business immune to fraudulent claims, liability risks, and operational inefficiencies.

Reduce employee theft:
POS transaction data embedded in your video archive provides irrefutable evidence to crack down on employee theft of cash, liquor, or other merchandise.

Manage your operations:
Use broadband Internet to connect to your restaurant locations from anywhere. Use Remote Eyes Enterprise Dashboard™ to see data and video from all your locations from any web browser. Daily operating reports tell you how many customers you served during each hour of operation, how much revenue you generated, and how much profit you earned!

Invest in your business:
Use broadband to connect to your stores from anywhere. See, hear, talk to, and receive data from your stores no matter where you are!

Increase Your Profits: *Use Remote Eyes to satisfy your loss prevention, cash shrinkage, employee theft, and remote management needs.*

"The Remote Eyes system from Odyssey has paid for itself in less than two months. I've seen a dramatic increase in sales and a decrease in shrinkage. The greatest benefit of Remote Eyes has been the 500% improvement in our customer service!"
—*Ron Furman, owner, Max's on Broadway, Baltimore*
