Remote Eyes® Expands to 64 Channels
Extended video management capacity for large installations

Hanover, Maryland, June 6, 2012 - Odyssey Technologies, Inc., a leading supplier of video surveillance equipment and software, is pleased to announce the expansion of its Remote Eyes video management software to support up to 64 channels of IP video. The enhanced Remote Eyes software works with both IP cameras and DVR cards.

John Webster, CEO of Odyssey Technologies, Inc., says: "In today's market, even a quick service restaurant needs more than the traditional 16 cameras most DVRs support. Today's owners want to cover the dining area, the kitchen, the cash registers, outdoor areas, and the drive-thru lanes, so we are seeing many owners requiring 32 cameras or more for their CCTV installations. By expanding our Remote Eyes software to 64 channels, we are taking what used to be a high-end solution and making it accessible to owners at a very cost-effective price point while still retaining the simplicity and ease of use that has been our calling card in this market."

About Odyssey Technologies, Inc.

Odyssey Technologies, Inc. was founded in 1997 and is an early pioneer in digital video. With over 11,000 video surveillance systems installed worldwide, Odyssey differentiates itself by providing equipment, software, and services for centralizing and automating multi-site operations in Retail, Hospitality, Financial Services, and Property Management. Remote Eyes systems feature superior video compression, multi-site remote video management, and integration with point-of-sale, access control and networked transaction systems.
