Odyssey Technologies, Inc. Integrates Brivo® Online Access Control™ *Remote Eyes® combines network surveillance and access control*

Laurel, Maryland, August 24, 2009 - Odyssey Technologies, Inc., manufacturer of Remote Eyes® digital video management systems, has partnered with Brivo Systems, LLC, the leader in Web applications for access control and security systems. Integration with Brivo's ACS WebService™ allows Remote Eyes users to quickly search for exceptional access control events using a variety of search criteria. Users can then instantly inspect an access control event of interest by using the Remote Eyes video archive to locate the video clip associated with that event. Remote Eyes uses real-time text insertion to burn the access control event directly into the video archive for later use as highly valuable forensic evidence.

"Integration with Brivo allows us to dramatically expand our access control offerings beyond the traditional LAN-based panel model. Using Brivo, our multi-location chain customers can buy enterprise software as a service and have a single Web-based control point for all of the readers in their stores, regardless of geography," stated Odyssey CEO, John Webster. "And for our dealers who are increasingly demanding IP solutions, Brivo trumps the legacy access control model."

"We are pleased Odyssey has chosen to integrate with Brivo. Remote Eyes is a compelling platform for video surveillance integration and management. This partnership broadens both of our capabilities to provide breakthrough IP-based integrated security solutions," said Brivo's President and Chief Executive Officer, Steve Van Till.

The integrated offering combines Remote Eyes H.264 network surveillance with the Brivo ACS WebService™ and is available immediately.

About Odyssey Technologies, Inc.

Odyssey Technologies, Inc. was founded in 1997 and is an early pioneer in digital video. With over 9,000 video surveillance systems installed worldwide, Odyssey differentiates itself by providing equipment, software, and services for centralizing and automating multi-site operations in Retail, Hospitality, Financial Services, and Property Management. Remote Eyes systems feature superior video compression, multi-site remote video management, and integration with point-of-sale, access control and networked transaction systems. About Brivo Systems

Brivo Systems, LLC, is an online physical access control system provider for organizations that need to protect and remotely monitor buildings and perimeter entry points using Internet and wireless technologies. The company's hardware products and software services enable businesses to control

physical access to offices, warehouses, remote/unmanned buildings, or sensitive areas such as computer rooms, where real-time control and accountability of entry are important. The company's Web-hosted solutions are based on open technologies that connect dispersed facilities to the Internet using secure, wide-area communications. For integrators, Brivo provides simple installation and one-hour end-user training.

Brivo is a wholly owned subsidiary of The Duchossois Group, Inc., a privately held holding company, headquartered in Elmhurst, Illinois, which owns AMX, The Chamberlain Group and Milestone AV Technologies. Duchossois also holds strategic interests in Churchill Downs, Inc. (NASDAQ:CHDN), and a number of other diversified businesses.
