

## iVMS-4500 Lite Software for iPhone

This software will only access DVR's with RES8.0 software build 8.4.6.23 or later. Download the iVMS-4500 lite file to your iPhone mobile device.

1. **Download iVMS-4500 lite by Hikvision from the Apple Store to your handset**
2. **Open the app and create a username and password**
3. Select devices and click the 'Add' option
4. Input the following connection information.
  - **Device Name**      **Demo**
  - **Register Mode**    **IP**
  - **Address**            **108.15.64.2**
  - **Port**                **8002**
  - **User name**         **demo**
  - **Password**          **demo**
  - **Chan No.**            **4**
5. Then Save and OK
6. Tap on Live Preview Icon
7. Tap on '+' sign for one of the cameras
8. Tap on demo and the four cameras will drop down
9. Tap Camera 1 and then OK
10. After "Initializing" and "video Buffering" the video will load
11. Tap on second camera and repeat process.

### Key Points:

- See the Help menu for features such as picture and video capturing, full screen functions, etc
- The software will not support PTZ control
- By modifying the user and password you can deny access to certain cameras
- Odd/odd can view only channels 1 and 3
- Even/even can view only channels 2 and 4
