Remote Eyes® Automates Retail Loss Prevention Alerts
Major Enhancement to POSWatch Enterprise™

Hanover, Maryland, July 12, 2013 - Odyssey Technologies, Inc., a leading video surveillance software vendor, is pleased to announce the addition of automated loss prevention alert management to its POSWatch Enterprise™ product. With automated alerts, POSWatch Enterprise will monitor all transactions for a chain of retail stores or restaurants and automatically alert management of exceptional behavior that could be indicative of employee theft.

John Webster, CEO of Odyssey Technologies, Inc., says: " With the addition of alert management, POSWatch Enterprise takes retail loss prevention to the next level by substantially reducing the manual analysis and auditing management has been doing to detect employee theft and fraud. When integrated with Remote Eyes video management software for real-time overlay of the transaction data with surveillance video, POSWatch Enterprise gives the chain operator a bullet-proof solution for his inside theft problems. And even without video integration, POSWatch Enterprise is a powerful data analysis tool that will tighten management controls for any retail or hospitality operation."

About Odyssey Technologies, Inc.
Odyssey Technologies, Inc. was founded in 1997 and is an early pioneer in digital video. With over 13,000 video surveillance systems installed worldwide, Odyssey differentiates itself by providing equipment, software, and services for centralizing and automating multi-site operations in Retail, Hospitality, Financial Services, and Property Management. Remote Eyes systems feature superior video compression, multi-site remote video management, and integration with point-of-sale, access control and networked transaction systems.
