Remote Eyes® Integrates with HotSauce™ POS
Loss Prevention Solution for Restaurants

Hanover, Maryland, May 24, 2016 - Odyssey Technologies, Inc., a leading video surveillance software vendor, is pleased to announce the successful integration of its Remote Eyes video management system and POSWatch™ loss prevention solution with the HotSauce Restaurant Management System, a high-end Point-of-Sale (POS) system that helps restaurants automate and manage their operations.

“HotSauce users can now enhance security and protection from employee theft with integrated video surveillance and loss prevention from Remote Eyes,” stated John Webster, CEO of Odyssey Technologies, Inc. “It’s as easy as placing the Remote Eyes software on the same network with the HotSauce POS server. Users with multiple locations can use Odyssey’s Enterprise Data Server™ to view transaction data and integrated video from all locations at once. Automated email alerts and enterprise level reporting make it fast and easy to monitor employee activity at each store.”

“HotSauce’s customers include single unit restaurants, multi-unit restaurant groups, and franchise restaurant chains,” Webster added. “Food service groups have long been the core of Odyssey’s customer base, so we are excited about the additional value HotSauce integration brings to our customers.”

About Odyssey Technologies, Inc.

Odyssey Technologies, Inc. was founded in 1997 and is an early pioneer in digital video. With over 15,000 video surveillance systems installed worldwide, Odyssey differentiates itself by providing equipment, software, and services for centralizing and automating multi-site operations in Retail, Hospitality, Financial Services, and Property Management. Remote Eyes systems feature superior video compression, multi-site remote video management, and integration with over 50 leading point-of-sale, access control and networked transaction systems.
